Software 4.0 upgrade guide

SERSTECH

Chemical intelligence solutions

Software upgrade guide – to version 4.0

Make a backup first!

• Your old measurements and local databases will not automatically follow the upgrade. If you want to keep your history and local databases, please remember to make a backup before you proceed with the upgrade.

How to make a backup

- Connect the instrument to a PC using a USB cable
- Use the quick menu to activate USB.

How to make a backup

Activate USB DATA

Activate USB	
Back	

A unit called i100_data will appear on your computer

→ i100_data (E:)					
^ Name ^	Date modified	Туре	Size		
history	4/26/2016 12:39 PM	File folder			
🔄 logfile	5/2/2016 7:12 AM	File folder			
notices	4/26/2016 12:39 PM	File folder			
📄 serial	5/2/2016 7:11 AM	Text Document	1 KB		
sw_rel	5/2/2016 7:11 AM	Text Document	1 KB		

How to make a backup

- Open i100_data and copy the history folder. Open i100_conf and copy your local databases. Save it to a location on your PC or other location outside the Indicator.
- Please note, once you have made the upgrade to v.4.0 you cannot directly put the files back on the Indicator, you will need to use ChemDash. Contact Serstech Support, <u>support@serstech.com</u> for more information.
- Select USB Off on the Indicator.

How to upgrade to 4.0

• First, make sure the battery of your instrument is fully loaded.

- Please check your current Software version first! Make sure your instrument has the latest release 3.3.6 or later before upgrading to release 4.0. If the indicator has the wrong software version, the upgrade will fail.
- If you are unsure about your current version, go to "Settings" -> "About" in your Indicator.
- Download the file i100update 4.0 or if you have an earlier version than 3.3.6, make a first upgrade to 3.3.6.
- Save the file on your computer, not on an USB stick, that can sometimes create conflicts.

Name	Date modified	Туре	Size
i100update-REL-4.0.1-r2827-20160429-13	4/29/2016 1:36 PM	GZ File	42,665 KB

Upgrade using "Drag and Drop"

Log in to your Indicator and activate its USB mode:

- Settings->Administration->USB->Activate USB
- Or use "Quick Menu" ->USB-> Activate USB
- Note! You need to have the read and write privileges to do the updates. This can be set by the admin user.
- Connect the Indicator to your computer.
- Look for the i100_conf in your file browser

Upgrade using "Drag and Drop"

• We strongly recommend that you read the Release Notes before upgrading.

Drag and drop the file to the folder "updates" in your instrument (i100_ Conf)

🕳 > i100_conf (F:)				ٽ ~					
^	Name	Date modified	Туре	Size					
	📙 config	12/17/2015 10:33	File folder

(E:)	verify		failed		11/13/2015 7:59 AM	File folder			
(F:)	sw rel		logs		4/26/2016 12:40 PM	File folder			
9			old		11/13/2015 7:59 AM	File folder		_	
7		1	📄 i100update-REL-4.0.	1-r2827-20160429-13	4/29/2016 1:36 PM	GZ File	42,665 KB		

Deactivate USB, unplug from your computer and restart the instrument. Restarting can take time (up to 15 minutes). Please be patient.

To see which Software version you have, turn on your instrument, go to Setting -> About.

Software upgrade guide – to v4.0.

You should now have upgraded successfully!
